Steve – thanks for your comments on the MMP and Asbestos SOP. We can ask about the CDPHE permit for disposal tomorrow. The meeting is from 2:00 – 3:30 pm tomorrow afternoon.

Hi Paula, I looked over the Materials Management Plan and Asbestos SOP and they look OK to me. It should be noted that the project is obtaining a permit from CDPHE for disposal of groundwater that may be pumped from the excavation and appears to not yet be issued. We should request a copy of this wastewater permit when it is prepared because CTL plans to do water treatment on site and disposal to the storm sewer.

Also, I want to verify that our meeting tomorrow is at 2:00 pm. I somehow got the impression it was in the morning.

Thanks

Fonda and Paula,

I am submitting this Materials Management Plan for the High Street Outfall project. This city storm sewer project will be through OU2 of the VB/I-70 Superfund site and therefore an MMP will be required.

Apparently City of Denver is updating its SOP for dealing with asbestos in soils. I think we are all waiting for the CDPHE rule-making hearing on this issue, which occurs next week. So this portion of the MMP is missing but will be included/updated by City of Denver before the project kicks off. This will fall within the purview of CDPHE Solid Waste, so will not need to be reviewed by you folks, to my understanding.

Let me know if you would like a word version, hard copy, or anything at all. Please call with questions. Thank you.
